

D1 Activation Preamble

This is ----- my name is ----- and I am located in _____

This is a directed net in support of the ARES Fall Simulated Emergency Test
and no actual emergency exists at this time, I repeat no actual emergency exists at this time.

Our primary function is to assist in communications and traffic handling between counties but
will also aid otherwise as needed.

Stations needing to make a call not related to the SET are requested to come through net control
and to please be brief.

We will be using the repeater until about 1:00PM or until the set is concluded.

Net Control Station Notes

At this point the initial net control should ask for checkins from participating counties--starting
with D1 by alphabet and all later ncs's ask for additional counties/served agencies-- be shure to
ask for and record contact info (i.e. station tactical call and primary freq)

Every ten minutes ID and repeat

--- this a simulated emergency and no actual emergency exists at this time.

When changing net control duties -- the outgoing NCS needs to pass pertenant info to the
incoming NCS i.e. who is needing to get ahold of who and who is holding traffic for who etc.

The NCS closing the net should do so by saying

This has been a simulated drill and no emergency has existed at this time---this is ----.

I would like to thank all stations for participating and those who stood by, I also thank the
Amateur Radio Relay Group- for the use of their repeater I now return the ----- repeater to normal
amateur use.

this is ----- now clear
